Financial Data UI

📌 Project Overview

This project is a frontend application that displays financial data in a table format.
It also allows users to add the latest year financial data dynamically.

🚀 Features

- Display financial data in table format
- Data grouped under **Assets section**
- Dynamic columns for multiple years
- Add new year (31 March 2025) using a popup form
- Data updates instantly without page reload
- Basic validation for input fields

🛠 Tech Stack

- React.js
- JavaScript
- Bootstrap (for styling)
- Bootstrap Icons

📂 Project Setup

Step 1: Install dependencies

```
npm install
```

Step 2: Run the project

```
npm start
```

Step 3: Open in browser

```
http://localhost:3000
```

📊 How It Works

1. The table displays financial data from JSON
2. Click **"Add Latest Year Financials"**
3. A popup form will open
4. Enter values and click **Submit**
5. A new column (2025) will be added dynamically

⚠️ Assumptions

- Data is handled in-memory (no backend)
- Only Assets section is implemented
- Some fields are selected for simplicity

🎥 Demo

- Shows table rendering
- Adding new financial year
- Dynamic update of UI
